THORDON BEARINGS INC.

GO GREASE FREE WITH THORPLAS-BLUE RUDDER BEARINGS

REDUCE MACHINING TIME | **REDUCE WASTE** | **REDUCE MAINTENANCE**

Backed by over 30 years of experience in demanding marine applications, ThorPlas-Blue rudder bearings simplify maintenance, reduce downtime and eliminate the need for grease. Thordon's products are engineered specifically for these tough working conditions, helping you ***take the WORK out of WORKboat***.

From pushboats and tugboats operating in dirty, abrasive waters, ThorPlas-Blue rudder bearings provide a reliable, low-maintenance alternative to greased bronze. With grease-free operation, high pressure capacity, and smooth, binding-free rudder movement, ThorPlas-Blue delivers dependable performance in tough working environments.

Built Tough. Made Simple.

Thordon's ThorPlas-Blue rudder bearings leave the grease behind for less maintenance and more time on the water.

Now, Thordon's ThorPlas-Blue rudder bearings come in standard sizes to save machining and reduce costs, with easy to remember part numbers and imperial measurements.

Thordon has made replacing your rudder bearings with a longer-lasting, grease-free solution even easier.

Standard Sizes for Optimal Savings

ThorPlas-Blue rudder bearings are available in standard sizes that more closely match finished bearing dimensions, reducing material waste, material cost, and machining time. The result is a more cost-effective solution, for simplified bearing replacement and less time spent in the shop.

ThorPlas-Blue for Rudder Bearings

ThorPlas-Blue is a homogeneous, self-lubricating thermal plastic material with low dry coefficient of friction, high strength, and low creep.

ThorPlas-Blue bearings are tough, reliable and fit into virtually all applications where greased bronze is used.

- Operate without grease
- Allow quick, easy bearing installation and replacement
- Enable rudders to operate without any binding
- Operate under high loads of pressures (up to 6,527 psi)
- Eliminate oily runoff into waterways
