What we do:

Thordon Bearings designs and manufactures a complete range of sleeve bearing systems and seals for marine, clean power generation, pump and other industrial markets. The non-metallic polymer bearings operate pollution free without oil or grease.

Products:

Marine: Propeller shaft bearing systems, rudder bearing systems, deck equipment bearings, dredge bearings, offshore oil bearings, corrosion resistant shaft coatings, propeller shaft seals, water quality packages

Clean Power Generation: Hydro turbine bearings, main turbine seals, wave, tidal and river current bearings

Pump and Industrial bearings

Current markets: Worldwide to over 90 countries, primarily marine (merchant fleet, Navy/Coast Guard, workboat, yacht, fishing, dredge, offshore), clean power generation, pump, industrial markets

Unique Characteristics:

Proprietary polymers with pollution-free operation: Thordon bearings operate without oil and grease

Strong engineering with full design and CAD capabilities

Strong, factory-trained distribution network with over 75 Agents and Distributors worldwide

Quality procedures are certified to the ISO 9001:2008 Quality System

Memberships:

World Ocean Council, Green Marine, International Windship Association (IWSA)
