HIGH PERFORMANCE OIL & GREASE-FREE PUMP BEARINGS

Thordon Bearings is the world’s leading manufacturer of high performance, long lasting bearings that require no oil or grease. Thousands of pump repair shops, OEM’s and end users around the world recognize Thordon bearings as the proven choice for performance and value. Thordon bearings are made to last, with no negative impact to the environment.

We design and manufacture the most complete line of product lubricated vertical pump bearings in the industry. Our elastomeric grades offer the best combination of strength and stiffness with flexibility and elasticity, along with high abrasion resistance. Our thermoplastic grades operate at higher temperatures and pressures than Thordon elastomers with improved chemical resistance.

Thordon Bearings are available with self lubricating properties that do not require grease or oil lubrication in start-up and are designed for product lubrication.

Benefits for Pump Operators:

- Long wear life and lower maintenance costs mean predictable, lower life-cycle costs
- Self lubrication allows dry start-up for bearings, eliminating pre-lubrication systems
- Global availability provides superior customer service and quick turnaround
- Full-cycle technical support includes system design, machining, installation & after-sales service
- ThorPlas-White has been listed by the NSF International Certification and WRAS for NSF/ANSI/CAN 61 Drinking Water System Components, as well as is classified as an accepted material by CFIA.

Benefits to Pump Manufacturers:

- Fully customizable for any shaft and housing combination
- Easily installed with freeze fit, press fit, or bonded fit
- High resilience & impact resistance
- Reduced starting torque
- Easy & safe to machine

Why Use Thordon Pump Bearings?

- Long wear life & high abrasion resistance
- Dry start-up capability
- Low friction – no “stick-slip”
- Fully customizable for any shaft and housing combination
- Easily installed with freeze fit, press fit, or bonded fit
- High resilience & impact resistance
- Reduced starting torque
- Easy & Safe To Machine

Projected Bearing Wear by Volume (cc/24 Hours)

(Independent testing at University of Cincinnati, USA)

NOTE: Abrasive particle abraded
- Shaft material: carbon steel
- Bearing OD: 2.5 cm (1 in)
- Abrasive slurry mixture: 2% bentonite, 6% sand, 6% clay, 86% water

Benefits to Pump Manufacturers:

- Fully customizable: To suit any shaft and housing combination
- Dry start-up capability: Allows elimination of pre-lubrication systems
- Sizing flexibility: Provides an easy design experience
- Easy to machine: No harmful dust
- Easy to install: Freeze fit, press fit or bond fit.

** For dry start-up times longer than 30 seconds, please contact Thordon Engineering for grade selection.

Note: For Nuclear use, Quality Control certificates including certified test reports can be supplied. Thordon Bearings Inc. operates under the provision of 10 CFR21.

## COMPLETE LINE OF HIGH PERFORMANCE VERTICAL PUMP BEARINGS

**Thordon SXL**
- Preferred choice for dry start-up capability
- Lower dry coefficient of friction typically 0.10 - 0.20
- Working pressure to 10 MPa (1450 psi)
- Wet or dry operation
- High resistance to abrasion, shock loading and vibration

**Thordon Composite (GM2401)**
- Made specifically for use in very abrasive water environments
- Stiffer and at least twice the abrasion resistance of rubber
- Lower coefficient of friction than rubber
- Reduced maintenance downtime
- Water lubricated – no grease
- Easy installation

**ThorPlas-Blue**
- Dry start-up capability
- Operates in water/chemicals up to 80°C (176°F) and 110°C (230°F) dry
- Engineered Thermoplastic capable of design pressures up to 45 MPa (6527 psi)
- Very low wear in non-abrasive environments

**ThorPlas-White for Drinking Water Applications**
- NSF/ANSI 61 and WRAS Material Approval
- Low friction operation
- Very low wear
- Good dry run capability due to built-in lubricants
- Easy to machine – no nuisance dust
- Easy to install

**PT80**
- Excellent mechanical property retention (in water), at higher temperatures
- Internal lubricants provide dry run capabilities similar to Thordon SXL
- Wear characteristics similar to existing Thordon elastomer grades
- High abrasion resistance
- Low coefficient of friction

**Thordon XL**
- Long life with low dry coefficient of friction
- Good abrasion resistance
- Optimum performance in clean water applications

---

**OTHER PUMP APPLICATIONS**
- Inclined Turbine Pump
- Volute Pump
- Submersible Pump
- Fire Pumps
PROVEN BENEFITS OF USING THORDON PUMP BEARING PRODUCTS

Pollution-Free High Performance Bearings
Thordon’s pollution-free bearings help preserve the environment. They require no oil or grease lubrication and offer an outstanding wear life, reduced downtime and lower life cycle costs.

Long Wear Life, Low Friction & High Abrasion Resistance
Thordon bearings absorb impact or shock loads with a dampening capacity that is nearly 500% greater than rubber!
Our bearings are self-lubricating which reduces abrasion and prevents wear. They also have a lower dry coefficient of friction which improves efficiency in frequent stop-starts. Low friction bearings also operate longer, wear less and have reduced start-up torque and “stick-slip”.

High Temperature & Improved Chemical Resistance
Thordon bearings are corrosion resistant and can withstand high temperatures. ThorPlas-Blue can be used in water and chemicals up to 80°C (176°F) while our polymer grades operate up to 60°C (140°F).

Easily Machined & Installed On-site
Thordon bearings are easily machined to exact dimensions and can either be press-fit or freeze-fit using dry ice or liquid nitrogen, or bonded using a Thordon approved adhesive.

Over 40 Years Experience in a Variety of Pump Applications
Thordon pump bearings have been used in open and closed tube vertical pumps in a variety of applications including Power Plants, Irrigation Stations, Flood Relief Stations, Pumping Stations, Pulp & Paper Mills, Sewage & Water Treatment Plants, Steel Mills, Oil & Chemical Refineries, Shipyards, as well Marine & Offshore applications.
Continuous innovation along with a variety of bearing grades and configurations position Thordon bearings as the ideal solution for cooling water, potable water, circulating, drain, stock, fire, dry dock, deep well, drain water lifting, condensation, submersible and screw lift pumps.
For pump-turbine applications refer to Thordon’s Hydro-Turbine Bearings brochure.

THORDON PUMP BEARING SOLUTIONS

Thordon Bearings Inc. designs and manufactures the industry’s most complete line of oil and grease-free water lubricated vertical pump bearings.
Elastomeric grades (XL, SXL, Composite, GM2401 and PT80) offer exceptional wear life, low friction and reduced starting torque.
Thordon Bearings also manufactures ThorPlas-Blue and ThorPlas-White engineered thermoplastic bearings that offer better chemical resistance and operate at temperatures up to 80°C (176°F).
ThorPlas-White is the newest Thordon grade, specifically developed to operate as a drinking water system component used in the treatment and distribution of potable water.
CUSTOMER FOCUSED TO QUICKLY MEET YOUR NEEDS

Quick and Responsive Service
It takes quality products to be globally successful in the bearing and shaft seal industry. It also takes great service to keep customers coming back. Thordon Bearings Inc. is geared to respond quickly to supply high performance bearing solutions. Thordon bearings arrive quickly, fit correctly and they last!

Extensive Distribution Network
Thordon Bearings has an extensive distribution network of more than 75 distributors to supply and service our global customer base. Non-standard requests are met with responsive design, quick machining and speedy delivery.

Application Engineering
Thordon engineers work closely with customers to provide innovative bearing and shaft seal system designs and solutions. We offer in-house design, CAD and the proprietary Thordon Bearing Sizing Calculation Program to help correctly size our bearings. Our decades of experience mean that we offer the right technical support during design, machining, installation and operation.

Manufacturing Quality
Thordon Bearings Inc. is a family-owned company founded in 1911 that operates a state-of-the-art polymer processing plant, machine shop and new product development facilities in Burlington, Ontario, Canada. In addition, we own a leading edge machining and polymer production plant in Slupsk, Poland. We manufacture to ISO 9001 Quality System requirements. Contact us for our installation references.

High Performance Bearings; Industry-Leading Service
Thordon Bearings is an industry leader in the design, manufacture, supply and installation of high performance, pollution-free, bearing and shaft seal systems.
